

Rulerwork for Beginners featuring Creative Crosshatching Designs

Supply List:

Items used during the class:

- The Westalee Starter Foot Set which includes the 12" Arc Template and a Westalee Rulerfoot or other ½" rulerfoot appropriate for your machine
- Westalee Heart Template 5" or 6" size.
(You may buy the set but only 1 is required for class.)
- Stable Tape
- Spacing Gauge
- Gliders (Freemotion or Rulerwork Gliders)
- Flat Extended Machines surface like a Sew Steady table or similar. (This is important for success in this technique because the ruler needs to rest somewhere flat and be able to move more than just a few inches.)

Optional Item

- The Westalee Crosshair Squares in 6 and 8 Point are useful if you have them, but not required. If you own any of these, please have it handy for class.

Standard quilting supplies are also recommended:

- 2 Fat Quarter Quilt Sandwiches *(A good quality batting and fabric is recommended for best results)
- 90/14 Topstitch or Quilting needle
- Polyester 40wt or 50wt 3 ply thread in a low contrast to the fabric but not matching as we want people to see what they are doing.
- Appropriate spool cap and/or thread support for the type of thread being used.
- Thread snips
- Quilt safe marking tools
- Rotary ruler for measuring and marking on the quilt sandwich (8"x14" or similar)

***NOTE:** Ability to drop your feed dogs or feed dog cover for your machine is highly recommended as is the use of an appropriately sized, flat extension table. No smaller than an 18"x 24" extension table size is recommended for best results. These may take 4-6 weeks to order in some places so please do not wait until that last minute to secure one for your machine.
